

Resources

Most of my sources were found from the typed documentation from my great great aunt Cathy, throughout her life she had put together about ten completely filled binders of information and it was given all to my dad a few years ago. This information also included reasons why my ancestors migrated.

I am also a part of the Buckles Family Facebook group and was able to ask people who know information all about the Buckles family, when I had questions.

My grandma Joan also started writing a memoir which I was able to find and use the information to learn about her side, and my mom's grandparents and how they came from Latvia and Turkey. Unfortunately the project has since been abandoned.

My Aunt Simone's side was based on stories and information told to my aunt which she later told me over Thanksgiving break, which I found very interesting and wanted to include in my research.
